

# Prevent Heat Illness at Work

**Outdoor** and **indoor** heat exposure can be dangerous.

## Ways to Protect Yourself and Others

### Ease into Work

**Nearly 3 out of 4 fatalities from heat illness happen during the first week of work.**

- ✓ **New** and **returning** workers need to build tolerance to heat (acclimatize) and take frequent breaks.
- ✓ **Follow the 20% Rule.** On the first day, work no more than 20% of the shift's duration at full intensity in the heat. Increase the duration of time at full intensity by no more than 20% a day until workers are used to working in the heat.

### Drink Cool Water

Drink cool water even if you are not thirsty — at least 1 cup every 20 minutes.

### Dress for the Heat

Wear a hat and light-colored, loose-fitting, and breathable clothing if possible.

### Take Rest Breaks

Take enough time to recover from heat given the temperature, humidity, and conditions.

### Watch Out for Each Other

Monitor yourself and others for signs of heat illness.

### Find Shade or a Cool Area

Take breaks in a designated shady or cool location.

### If Wearing a Face Covering

Change your face covering if it gets wet or soiled. Verbally check on others frequently.

## First Aid for Heat Illness

**The following are signs of a medical emergency!**

- Abnormal thinking or behavior
- Slurred speech
- Seizures
- Loss of consciousness

**1** » **CALL 911 IMMEDIATELY**

**2** » **COOL THE WORKER RIGHT AWAY WITH WATER OR ICE**

**3** » **STAY WITH THE WORKER UNTIL HELP ARRIVES**

**Watch for any other signs of heat illness and act quickly. When in doubt, call 911.**

### If a worker experiences:

Headache or nausea  
Weakness or dizziness  
Heavy sweating or hot, dry skin  
Elevated body temperature  
Thirst  
Decreased urine output

### Take these actions:

- » Give water to drink
- » Remove unnecessary clothing
- » Move to a cooler area
- » Cool with water, ice, or a fan
- » Do not leave alone
- » Seek medical care if needed
