

## Safety Director Message

The National Safety Stand-Down to Prevent Falls in Construction is May 2 through May 6, 2022. Falling from heights is a leading cause of injuries to employees of public works, utilities, public housing, and the fire service. The Safety Director encourages leaders in these industries to participate in the Stand-Down. To assist, please visit the [MSI Stand-Down](#) for additional information and please consider using this national initiative to reach your employees.
