

Safety Director Message

The New Jersey MEL has produced a document to provide our Municipal Joint Insurance Fund members with [Risk Management Strategies for Lifeguard Operations](#). The length and scope of this document are limited, and there may be several other topics of discussion that are not covered, but the idea is to promote serious thought about what we can do to mitigate the risks associated with this operation. The goal is to engage in the continuous improvement process by enhancing life-saving operations by identifying and implementing best business practices, to protect our personnel from physical and mental injury, and to mitigate the risks and challenges of litigation.
